“Wherever there are young people there must be noise. Things can be toned down later on... Go forward. There will be people who will say things to you to slow you down, to block your path. Please, go against the current. ...Go against the current, against this civilisation that is doing us so much harm. Understand? Go against the current: and this means making noise. Go forward, remaining true to the values of beauty, goodness and truth.” - Pope Francis, Address to the Young People from the Italian Diocese of Piacenza-Bobbio, 28 August 2013
