### Nurse Notes

Happy Spring!!!  
As we have seen lately  
Spring has the  
tendency to give us  
big, quick temperature  
changes that can  
leave you vulnerable  
to colds and other  
illnesses. Although  
there is no cure for the  
common cold you can  
relieve symptoms by  
getting plenty of sleep,  
staying hydrated and  
having symptom  
relieving medicines on  
hand.

You boost your  
chances of avoiding a  
cold by washing your  
hands often and  
making a habit of  
cleaning items around  
the house that  
everyone touches  
regularly, like  
bathroom faucets,  
fridge doors and TV  
remote controls.
